

Part F
 Focusing Plate
 Quantity: 1
 Tolerances: ± 0.010
 unless otherwise noted

Material: SS304

This plate is put in place of the repeller when one wishes to align a laser through the center of the assembly. An alignment tool keys into the .250 dia hole.

Drill thru, 4 holes 5/16" placed as shown on a 2.375" dia circle as shown to within 0.001" of true position. Part D will key into holes

Section C-C
