

Part E
 Spacer for ion optics
 Material: Semitron ESD 225 (supplied)
 Quantity: 4
 Scale: 8:1

Important: All 4 pieces should be as close to the same length as possible (along with the 4 pieces of part D). Must key into holes of Part C.

Note that the right side of this is poorly drawn and cut off. It should show a male thread on the right that is just shy of 1/4 inch long. There is no drawing for the two male nuts, one to screw into the left side of this piece and one on the other end of the assembly.
